<u>Sample Testing Criteria Sheet</u>	
End product- How will material be used?	
Material Composition?	☐ Metal, ☐ Chrome, ☐ Wood, ☐ Plastics, ☐ Other:
Expected Results?	
Depth or Width of Engraving?	
What needs to be marked? E.g.: Graphics, text, bar codes, etc...Include layout.	
Font name, font size?	
Marking time frame required?	
Remark	

Following is what we require in order to properly advise you on the right machine for your application:

1. We require at **least** 2 sample materials (or more) to be shipped for testing. If possible, also mail us your present product or a photo of what you want to accomplish. If you allow us, we would like to keep a sample for our records unless you request to send all samples back.
2. Depending on the process of engraving, samples may take a few days (rotary samples & CO2 Laser will take approximately one (1) week, while fiber laser 2-3 weeks). If samples are needed sooner, please let us know and we will do our best to engrave them in-house or at our factory locations.
3. Please provide us with specifications for the content to be engraved. For example: Font, font size, depth required. If possible, provide us with the layout or a picture of it.
4. For fiber laser samples, we require vector files for best results such as: CorelDraw (cdr), AutoCad (dxf), or HPGL (plt) formats.
5. We will of course do our best to return a great sample back to you as our ultimate goal is to match the proper equipment to your marking needs. However, in the event that we fail to properly mark the sample or accidentally damage it, we are not responsible for loss of product; this is considered R&D for the purpose of an equipment\product\service purchase from Jorlink.

Please Mail All Samples To:

GCC America Attn: Jorlink Test Samples 20550 Carrey Road, Walnut, CA 91789 (Factory location for Fiber Galvo or High Power Laser equipment testing)
